

## **Para-Table Tennis Information Sheet**

# About the sport

Para-table tennis was included in the first Paralympic Games in 1960. Athletes compete either in standing or sitting (wheelchair) classes. Men and women compete individually and in doubles, as well as in team events. A match comprises five sets of 11 points each. The winner is the player or pair winning three of the five sets.

The rules of the International Table Tennis Federation (ITTF) also apply to the Paralympic table tennis competitions with slight modifications regarding the serve rules for athletes who compete in a wheelchair.

## Who can compete?

Last Updated: 30 November 2021

Para-Table Tennis is open to athletes with a physical or intellectual impairment. Athletes are required to submit medical reports and meet the minimum impairment criteria in order to compete.

Eligible impairments	Description	Minimum Impairment Criteria
Loss of limbs	Partial or complete absence of bones or joints due to amputation or deficiency from birth.	Leg: loss of at least 1/3 of a foot.  Playing arm: loss of more than 1 finger.  Non-Playing arm: loss of at least 2/3 forearm.
Muscle weakness/Impaired muscle power	Muscle weakness or paralysis from conditions such as muscular dystrophy, multiple sclerosis, nerve damage, spinal cord injury or other spinal condition.	Leg: loss of strength in a hip, knee or ankle that impacts on table tennis.  Playing Arm: weakness of the hand that affects table tennis, such as grip and power.  Non-Playing Arm: weakness of the arm.

Eligible impairments	Description	Minimum Impairment Criteria
Co-ordination impairments - Hypertonia, Ataxia, Athetosis	Impairments from neurological conditions such as acquired brain injury, cerebral palsy and multiple sclerosis that affect coordination and smoothness of movement and balance.	Co-ordination or movement difficulties in at least one arm or leg.
Restricted joint movement/Impaired passive range	Restricted movement or tightness in a joint/s from conditions such as joint fusions and other restricting conditions.	Joint movement restrictions in the shoulder, elbow, wrist, trunk, hip, knee or ankle.
Short Stature	Reduced standing height and limb length from conditions such as achondroplasia or other conditions that affect growth.	Males standing height 140cm or less. Female standing height 137cm or less.
Leg length difference	Significant difference in leg length due to a deficiency at birth or trauma.	Leg length difference of at least 7cm.
Intellectual Impairment	An IQ of 75, and impairment (conceptual, social and pract before the athlete is aged 18	ical skills) – that is observed

# Para-Table Tennis Sport Classes (TT=Table Tennis)

Sport Class	Description (Guide Only)	
Athletes with <b>Physical Impairment</b>		
TT1	Players with an impairment that affects their arms, torso and legs. Players play sitting and lock their wheelchair brakes on during play and hold their wheelchair with their non-playing arm	

Sport Class	Description (Guide Only)
	to assist with balance and movement.
TT2	Players who play sitting, with impairments in their torso and legs, with more arm movement than TT1 players. Players lock their wheelchair brakes during play and hold on to their wheelchair for balance.
ТТ3	Sitting players with good arm movement, and some movement in the torso. Players lock their wheelchair brakes during play. Players are able to reach some way out of their chair for extra reach on a shot.
TT4	Sitting players who have good use of their arms, and good torso balance when sitting upright to serve. Players are able to stretch their body to reach for shots but need to hold on for far reach shots. Players can move their wheelchair during play.
TT5	Sitting players with full torso and arm movement, but with insufficient leg movement to play standing. Players can move their chair and body without difficult to play a wide range of shots.
TT6	Players who have impairments in their arms, torso and legs who are able to play standing. Players are not able to move quickly around the table, and so use a highly tactical game.
ТТ7	Players who have more ability to move side to side during play than TT6, but are unable to move with power and speed.
TT8	Players who can move side to side smoothly during play, and play a wide range of shots. Players are challenged at high intensity due to difficulty with leg movement.
ТТ9	Players have a moderate impairment in one arm or leg. They are able to play a complete range of shots and move swiftly around the table, though balance and agility is affected when reaching for wide shots.
TT10	Players who have the most agility and speed during play. Players usually have mild movement difficulties with their non-playing arm or one ankle.

Athletes with an Intellectual Impairment

Sport Class	Description (Guide Only)	
TT11	Players with an intellectual disability. Players may have difficulty in planning shots and competition strategy.	
Not Eligible		
Not Eligible (NE)	Player does not meet the minimum criteria for the Para-sport classes, but may still be able to compete. Contact Table Tennis Australia for more information.
